

Salma Ashour

Frontend Developer | React.js

salma.ashour.abdelaziem@gmail.com | 01128103501 | [LinkedIn](#) | [GitHub](#)

SUMMARY

Computer Science and Artificial Intelligence student at Helwan University and Frontend Developer with hands-on experience building web applications using React.js, JavaScript, HTML, and CSS. Experienced in developing reusable components, responsive user interfaces, and API-integrated applications using REST APIs and asynchronous JavaScript. Strong foundation in problem solving, data structures, and algorithms, with a focus on writing clean, maintainable code and building user-focused web experiences.

EDUCATION

B.Sc. in Computer Science and Artificial Intelligence | Helwan University

Sep 2025 – Jul 2029

GPA: 3.66/4.00 (Excellent)

STEM High School, Obour

Sep 2022 – Jul 2025

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C, C++, Python

Frontend: HTML5, CSS3, React.js, Bootstrap, Tailwind CSS, Sass, jQuery

Web Technologies: REST APIs, Fetch API, DOM Manipulation, localStorage, Responsive Design

Tools: Git, GitHub, VS Code

PROJECTS

MegaMart | [GitHub Link](#)

React.js | JavaScript (ES6) | Bootstrap | CSS3

- Developed a responsive e-commerce website using React.js, Vite, Bootstrap, and CSS.
- Built reusable and modular React components using Props and Hooks for dynamic content rendering.
- Implemented responsive layouts optimized for desktop, tablet, and mobile devices.
- Integrated React Icons and applied modern UI styling to improve usability and visual consistency.

Article Management System | [GitHub Link](#)

HTML5 | CSS3 | Bootstrap 5 | JavaScript (ES6) | localStorage

- Developed a responsive CRUD web application for creating, viewing, editing, and deleting articles.
- Built dynamic article management and UI updates using JavaScript and DOM manipulation.
- Implemented client-side data persistence with Browser Local Storage, allowing article data to remain available across page refreshes.
- Designed an interactive Bootstrap modal for editing articles and created a responsive interface optimized for different screen sizes.

Countries Search | [GitHub Link](#)

HTML5 | CSS3 | Bootstrap 5 | JavaScript (ES6) | REST Countries API

- Developed a responsive web application that allows users to search for countries and view detailed information including flags, capital cities, population, and regions.
- Integrated the REST Countries API using the Fetch API and asynchronous JavaScript to retrieve and display real-time country data.
- Implemented search validation, loading states, and error handling for invalid or unsuccessful requests.
- Designed a responsive user interface using Bootstrap 5 and CSS.
